PROFILE

Software engineer working across mobile, web and the systems behind them. My experience includes React Native and Expo applications, React administration systems, API integration, state management, PostgreSQL, Firebase, cloud deployment and production releases. I am most effective when I can understand the real workflow, clarify incomplete requirements and help connect the interface, data and operational details into a maintainable product.

WHAT I BRING

Product context

Translating business operations and changing requirements into understandable product flows.

Technical range

Following work across mobile, web, APIs, data, infrastructure and third-party services.

Production awareness

Testing, releases, security concerns, migrations, support and the details after implementation.

PROFESSIONAL EXPERIENCE

Ziya Afrika

Feb 2025 — Present

Web & Mobile Developer

- Build React Native journeys for member groups, wallets, deposits, transfers, agent withdrawals, loans and repayments.
- Develop React administration workflows with server-driven pagination, multiple filters, status controls and debounced search.
- Integrate Go APIs using Redux Toolkit and RTK Query, and collaborate with backend engineers to clarify financial records, actors and business rules.
- Built an administration activity tracker that translates last-access data into clear operational health categories.
- Prepare end-to-end stakeholder demonstrations and document product, integration and application-security concerns.

Panache Technohub Limited

Oct 2024 — Feb 2025

System Developer

- Built internal administration portal features and mobile functionality for active products.
- Implemented React and Next.js interfaces with TypeScript, API integration and application-state management.
- Contributed to UI/UX decisions, testing, verification, research and code review.

Adzec Software and Tech

Jan 2024 — Aug 2024

Full-Stack Web Developer

- Developed and maintained customer-facing websites and translated user requirements into implementation work.
- Supported web maintenance, code review, research, content and project coordination.

Innovia Kenya

2023 — 2024

Full-Stack Web Developer

- Built and maintained web applications, gathered customer requirements and supported ongoing improvements.
- Worked across implementation, maintenance, customer support and code review.

Gritnet Solutions

React Developer

- Developed React interfaces and supported website delivery, requirements gathering and maintenance.

SELECTED PRODUCT

LifeFast

Founder, Product Designer & Full-Stack Mobile Engineer

Independently designed, developed and launched a fasting and wellness application combining fasting sessions, hydration, progress history, educational content and community participation.

- Built the React Native and Expo application with Redux Toolkit and RTK Query.
- Developed the Node.js and Express API with PostgreSQL and supporting administration tools.
- Deployed to DigitalOcean behind Nginx, configured domains and SSL, and managed the production database.
- Integrated authentication, password-reset email, notifications, advertising and in-app purchase experiments.
- Migrated data from CockroachDB to PostgreSQL and replaced blocked SMTP infrastructure with transactional email.
- Managed EAS builds, closed testing, Google Play compliance and the production release.

SELECTED ENGINEERING WORK

Authentication & sessions

Email/password authentication, persistent sessions, profile management and password-reset journeys.

State & API integration

Redux Toolkit and RTK Query for API communication, caching, mutations and invalidation.

Search & data-heavy lists

Server pagination, filters, status controls and approximately 300 ms debounced search.

Infrastructure & release

Ubuntu, Nginx, SSL, managed PostgreSQL, Android builds, testing and Play Store releases.

Third-party services

Firebase, Resend, Expo notifications, Google Play Billing, advertising and cloud uploads.

Product communication

Requirements clarification, backend collaboration, stakeholder demos and technical documentation.

EDUCATION

Multimedia University of Kenya

Bachelor of Business Information Technology
September 2019 — October 2023

Employment dates and references are based on the résumé supplied by Jane Ndirangu.
